

# ERDN

## CAP 2021+: balanced development among the dimensions of rural sustainability

Velké Bílovice

Trantinová M., Hlavsa T.

24. – 26. 9. 2019

# Why this topic?

## **Development of new CAP strategic plan is already under way**

- Do we have enough experience and studies to make the best change?
- Do we have we good analyses?
- Do we have enough information and experience with the implementation process?
- Can we correctly evaluate the results and impacts of agricultural policy?

- .....

- .....

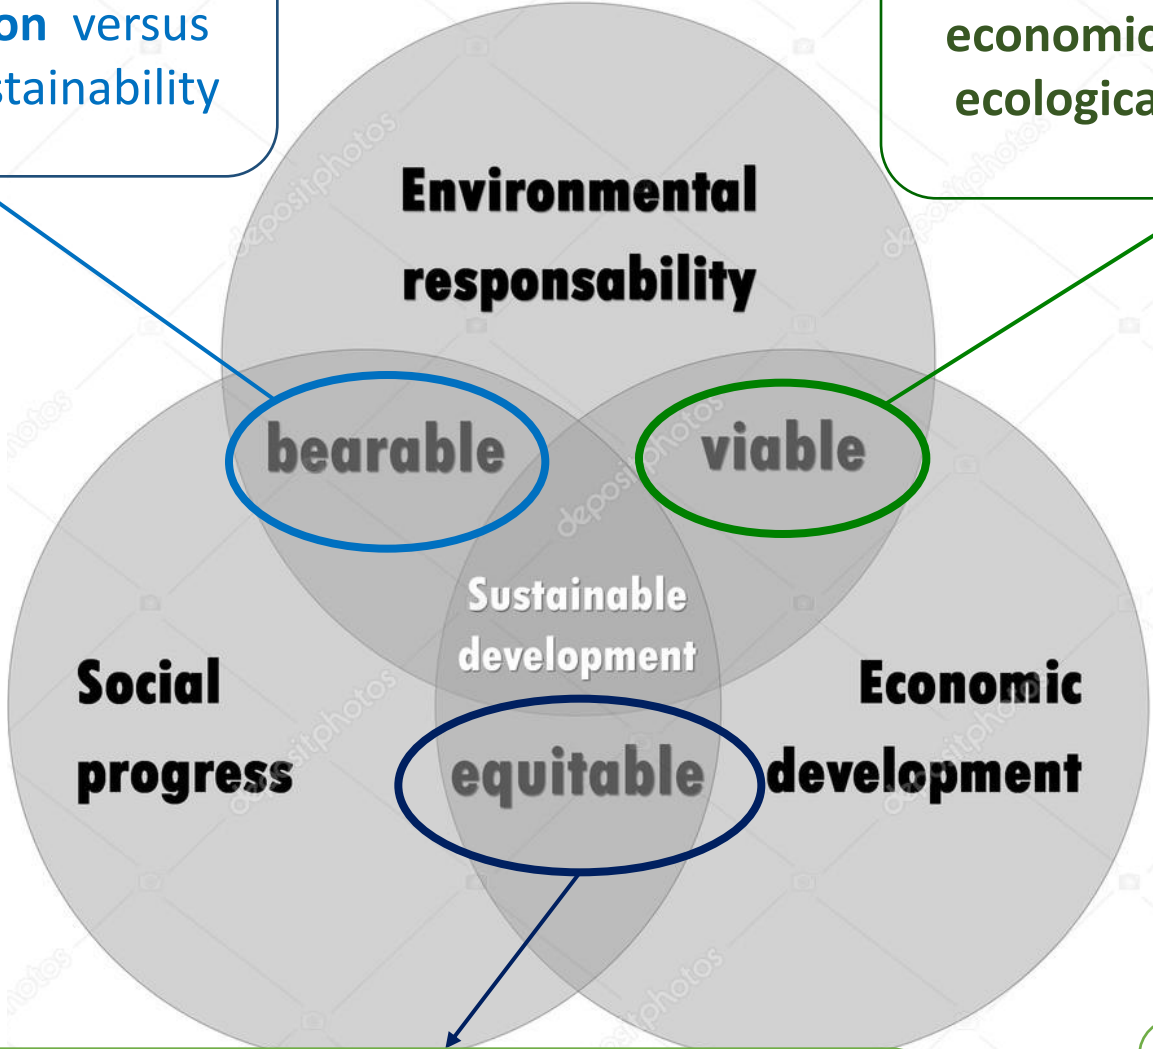

2) trade-offs between **social cohesion** versus **ecological sustainability**

3 papers  
2 posters

3) trade-offs between **economic growth** versus **social cohesion**

14 papers  
10 posters

# Questionnaire for conference participants - example

	1. Trade-offs between economic growth and ecological sustainability	2. Trade-offs between social cohesion and ecological sustainability	3. Trade-offs between economic growth and social cohesion
<b>How balanced are the areas?</b> 1- equal, 3 unbalanced	2	3	1
<b>Which area is more developed?</b>	Economic growth	Ecological sustainability	Both are equal
<b>Why are these areas more developed?</b>	Market, subsidies, environmental negligence	Measures from the RDP, few people interested in ecology	
<b>How could any imbalances be improved?</b>	Increased accountability for the impact of activities	Increased political participation, bottom-up management, increased environmental education and shared responsibility	Increased trust within communities through the development of LAGs and/or other associations
<b>Is this a good topic for ERDN?</b> (conferences, projects, future cooperation) Y/N	Yes	No	Yes
